## Key Community Supports - Fort William

Key Community Supports provides support and care services for people with a range of support needs including Learning Disabilities & Autism. As part of this we provide support to people of all ages including young people making the transition from school to further education, college, training and employment.

Key seeks to provide each individual with support and care which is flexible, person centred and tailored to individual needs and aspirations. We try at all times to find ways to offer support which enables each person to lead an ordinary life with the same opportunities as other adults in society.

Referrals can be made in the first instance through the Individual`s Health & Social Care Manager (Social Worker).
